About the Author

Patrick Felicia is a [lecturer and researcher](#) at SETU (South East Technological University), where he teaches and supervises undergraduate and postgraduate students. He obtained his MSc in Multimedia Technology in 2003 and his PhD in Computer Science in 2009, from University College Cork, Ireland. He has published several books and articles on the use of video games for educational purposes, including the Handbook of Research on Improving Learning and Motivation through Educational Games: Multidisciplinary Approaches (published by IGI), and Digital Games in Schools: a Handbook for Teachers, published by European Schoolnet. Patrick is also the Editor-in-chief of the [International Journal of Game-Based Learning](#) and the Conference Director of the [Irish Conference on Game-Based](#) a popular conference on games and learning organized throughout Ireland.

Support and Resources for this Book

You can download the resource pack for this book; it includes solutions scripts for some of the sections in this book, as well as some of the files needed to complete some of the activities presented in this book.

To download these resources, please do the following.

If you are already a member of my list, you can just go to the member area using the usual password and you will gain access to all the resources for this book.

If you are not yet on my list, you can do the following:

Open the following link: <http://learntocreategames.com/books/>

Select this book C# Programming by Creating Games with

On the new page, click on the link labelled or scroll down to the bottom of the page.

In the section called your Free Resource enter your email address and your first name, and click on the button labeled I want to receive my bonus

After a few seconds, you should receive a link to your free start-up pack.

When you receive the link, you can download all the resources to your computer.

This book is dedicated to Mathis

[About the Author](#)

[Support and Resources for this Book](#)

[Table of Contents](#)

[Preface](#)

[What you Need to Use this Book](#)

[Who this Book is for](#)

[Who this Book is not for](#)

[How you will Learn from this Book](#)

[Format of each Chapter and Writing Conventions](#)

[Special Notes](#)

[How Can You Learn Best from this Book?](#)

[Feedback](#)

[Improving the Book](#)

[Supporting the Author](#)

[1 Installing Unity and Becoming Familiar with the Interface](#)

[What is a game engine and should you use one?](#)

[Advantages of using Unity](#)

[Downloading Unity Hub](#)

[Installing Unity](#)

[Launching Unity](#)

[Understanding and becoming familiar with the interface](#)

[The scene view](#)

[Discovering and navigating through the scene](#)

[The hierarchy view](#)

[The project view](#)

[The inspector](#)

[The console view](#)

[The asset store window](#)

[Level roundup](#)

[Summary](#)

[Checklist](#)

[Quiz](#)

[2 Introduction to C# programming](#)

[Introduction](#)

[Statements](#)

[Comments](#)

[Variables](#)

[Arrays](#)

[Constants](#)

[Operators](#)

[Conditional statements](#)

[Switch Statements](#)

[Loops](#)

[Level Roundup](#)

[Checklist](#)

[Quiz](#)

[3 Creating your First Script](#)

[Workflow to create a script](#)

[How scripts are compiled](#)

[Coding conventions](#)

[A few things to remember when you create a script \(checklist\)](#)

[Common errors and their meaning](#)

[Best practices](#)

[Variable naming](#)

[Methods](#)

[Debugging using dichotomy](#)

[Creating a script](#)

[Writing your first statement](#)

[Using variables](#)

[Creating methods](#)

[Modifying the scope of variables](#)

[Creating your first class](#)

[Overloading our constructor](#)

[Using constant variables](#)

[Constant and static variables](#)

[Using the switch case structure](#)

[Using arrays and loops](#)

[Instantiating visual objects in your scene](#)

[Level Roundup](#)

[Checklist](#)

[Quiz](#)

[Challenge](#)

[4 Creating an Infinite Runner](#)

[Adding movement to the character](#)

[Adding random obstacles to the scene](#)

[Displaying the score](#)

[Improving the appearance of the game](#)

[Creating the static environment](#)

[Pausing the game](#)

[Level roundup](#)

[Checklist](#)

[Quiz](#)

[Challenge](#)

[5 Using Classes with C#](#)

[Introduction](#)

[Classes](#)

[Defining a class](#)

[Accessing class members and variables](#)

[Constructors](#)

[Destructors](#)

[Static members of a class](#)

[Inheritance](#)

[Methods](#)

[Accessing methods and access modifiers](#)

[Common methods](#)

[Scope of variables](#)

[Events](#)

[Polymorphism \(general concepts\)](#)

[Dynamic polymorphism](#)

[NameSpaces](#)

[Level Roundup](#)

[Checklist](#)

[Quiz](#)

[6 Creating a Simple 2D Shooter](#)

[Adding the spaceship](#)

[Shooting missiles](#)

[Destroying the target](#)

[Spawning moving targets randomly](#)

[Managing Damage](#)

[Checklist](#)

[Quiz](#)

[Challenge 1](#)

[Challenge 2](#)

[7 Using Lists and Dictionaries in C#](#)

[Lists](#)

[Dictionaries](#)

[Events](#)

[Level Roundup](#)

[Checklist](#)

[Quiz](#)

[8 Creating a Word Guessing Game](#)

[Creating the interface for the game](#)

[Detecting and processing the user input](#)

[Choosing random words](#)

[Tracking the score and the number of attempts](#)

[Choosing words from a file](#)

[Level roundup](#)

[Checklist](#)

[Quiz](#)

[Challenge 1](#)

[Challenge 2](#)

[9 Saving and Loading Information with local files in C#](#)

[Saving single records](#)

[Saving multiple Data for 1 player](#)

[Saving multiple Data for several players](#)

[Saving Multiple Data \(Continued\)](#)

[Using JSON and XML for more complex data](#)

[Level Roundup](#)

[Checklist](#)

[Quiz](#)

[10 Accessing and Updating a Database in C#](#)

[Introduction to Online Databases](#)

[Accessing a database through PHP](#)

[Passing data to a PHP script](#)

[Accessing PHP from Unity](#)

[Setting up your server](#)

[Creating new tables](#)

[Creating and running your PHP script](#)

[Gathering data from Unity](#)

[Updating the player's records](#)

[Level Roundup](#)

[Checklist](#)

[Quiz](#)

Challenge 1

11 Reading Files and Creating Scenes Procedurally with C#

Building your environment from an array

Creating an environment from a text file

Creating an environment from an image file

Using XML files for content creation

Creating a Maze Procedurally

Creating an environment like Minecraft procedurally

Creating a virtual solar system based on an XML file

Level Roundup

Checklist

Quiz

Challenge 1

Challenge 2

Challenge 3

12 Using Linear Algebra with C# for Unity

Using vectors and forces

Coordinate systems

Scalars and vectors

Why use vectors rather than scalars?

Mathematical notations for vectors

Using vectors in Unity

Performing operations on vectors

Adding and subtracting vectors

Adding vectors in Unity

Multiplying vectors by scalars
